# **Container Identification**

inotec are specialists in container management labelling and can provide solutions for identifying reusable containers in any material formats, in container pools or in open circulation.

We offer Adhesive and In-mould labels in all Auto Id Formats: Barcode, 2D and RFID.

INO-TAG is the name of our RFID label range which allow fast, accurate, automatic identification of objects without the need for contact or 'line-of-sight' scanning.

Our labels are printed using the latest in digital print technology, offering unlimited colours.

## **Adhesive Labels**

Our range of adhesives can be matched to suit any container substrate, for example different types of plastics, steel or wood.

Permanent under-surface printing ensures the highest levels of scratch resistance and durability.

inotec labels also guarantee effective handling, enabling fast accurate readability with conveyor or hand held scanning systems, which is so critical to the transport and logistics industries.

Our adhesive labels are weather-proof, UV resistant, scratch-proof, and resistant to chemicals.

#### Suitable products:

Barcode: DioTough, Diomaster, Diomaster 250PC

RFID: inotag Diotough, inotag Diomaster, inotag Diomaster 250PC

## **In-mould Labels**

inotec also offer in-mould labels, which can be bonded directly into the surface of plastic containers during the manufacturing process.

The bond between label and crate becomes permanent, offering a smooth edgeless surface, which eliminates the risk of contamination behind the label.

This makes our in-mould labels the ideal choice for food and pharmaceutical industries.

### Suitable products:

Barcode: DioBond / RFID: inotag DioBond

#### Logistics references:

Our container solutions are already being used successfully by Ocado, Boots, Next, John Lewis, Royal Mail, Jaguar Land Rover and many more.

Adhesive & In-mould Container labels

Barcode , 2D Code or RFID

Adhesive labels for Plastic, Metal & Wood

Scratch Resistant
Weather Resistant
Wash Resistant

In-mould Labels

No Adhesive Permamanet bond

Ideal for food and pharmaceutical
